

REAL-TIME DATA. REAL LIFE. REAL PATIENT MONITORING.

REMOTE PATIENT MONITORING (RPM)

Manage your critical chronic care patients using real-time, immediate blood pressure results delivered directly to your provider team.

DATA YOU CAN TRUST

AT&T 4G/5G cellular network and Cat-M technology ensure immediate connectivity and data transmission through a reliable network.

CONNECTED CARE BETWEEN VISITS

Patient-friendly and straightforward devices reduce user errors to improve patients' adherence to your remote monitoring program by eliminating the need for downloading apps, pairing & syncing with devices and uploading data. With increased patient adherence, you have more data to provide care that improves health outcomes.

INCREASE REVENUE

Effectively monitor patients using TimeDoc Health Blood Pressure Monitors to qualify for Medicare reimbursement under CPT® codes 99453, 99454, 99457, 99458, or G0511.

Features	Benefits
Light weight	Portable and compact
Large display screen	Easy to see and understand
4 x AA batteries	Easy to insert and replace
One button operation	Easy to use – one button to start and stop
Adjustable cuff size	Adult Large cuff adjusts from 8.6-16.5in. (22-42cm)
Cellular connectivity	No Apps, Syncing, Pairing, or Uploading
LTE-M (Cat-M)	Fast, reliable transmission
Data transfer	Simple API data integration
Excessive Body Motion Detection	Provides better accuracy and more consistent measurements

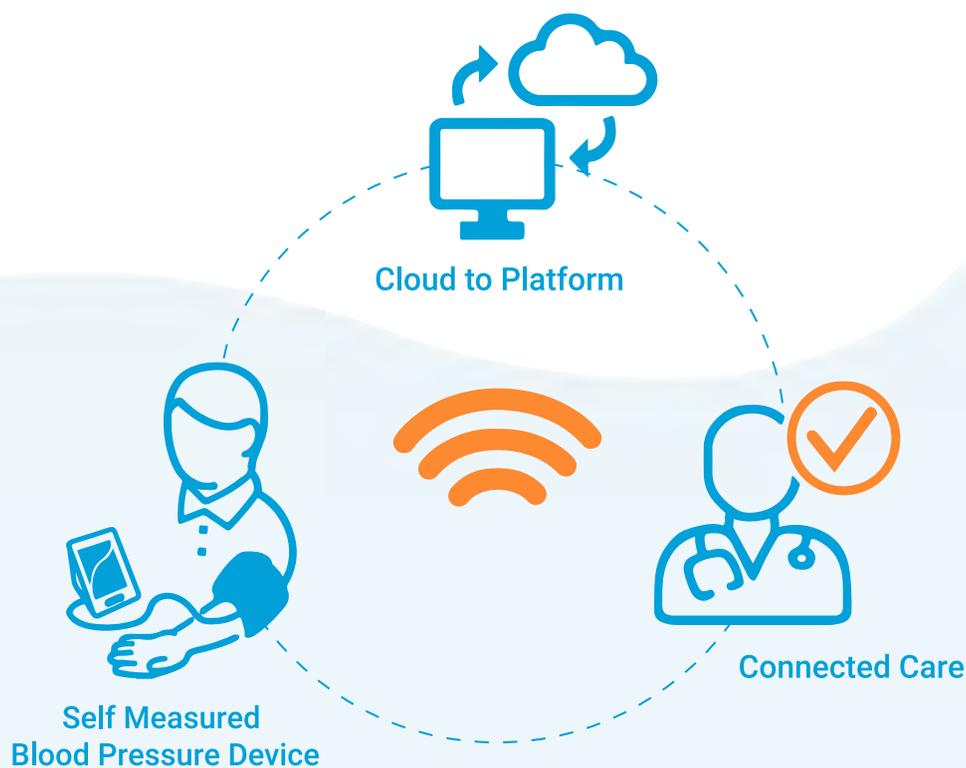

When every reading, every minute, and every patient count, you can depend on the TimeDoc Health's Blood Pressure Monitor to deliver reliable data you can trust. Our platform offers a robust, affordable, and state-of-the-art remote patient monitoring program.

THE CAT-M/LTE-M CELLULAR DIFFERENCE

Cat-M is a cellular LTE-M technology used by leading consumer goods companies and products on the market. This technology enables a cellular-connected device to be substantially enhanced compared to ordinary LTE devices with weaker signals. This enhanced technology provides better building penetration reducing interruptions, ensuring a more secure connection for real-time RPM resulting in trustworthy clinical efficiencies.

THE TIMEDOC HEALTH DIFFERENCE

Our device optimizes connected care in the patient's home by instantly making accurate measurements available to your provider team.

TimeDoc Health's robust remote patient monitoring solution delivers products, performance, and care you can count on.
